

# Health Systems Strengthening

*Daniel Low-Beer*

The Global Fund for AIDS, TB and malaria

**IOM Committee on Global Health**

# Contents

1. Performance based financing
2. Flexible Finance
3. Disease Programs/Health Systems
4. Conclusions and Opportunities

# Performance based financing

## Global Fund principles

- Focus on disease results: services and outcomes
- Delivery: health and community systems
- Country ownership of implementation

Diseases AND health systems

# Flexible Financing

- Global Fund major financier of Health Systems
  - Significant proportion of grant budgets
  - Strategic actions beyond a single disease
- Significant HSS: M&E, procurement, management, increasingly human resources
- Mind the gap in HSS
  - US\$ 56 billion for human resources for MDGs
  - Need for other partners

Full range of partners and private sector

# Strong disease programs necessary for HSS

- Reduces deaths of health workers
  - Malawi, health workers halved in 1990s
- Reduces disease burden in hospitals
  - AIDS and malaria up to 50% of in and outpatients
  - Rwanda declines in hospital burden
- Disease causes of health burdens
  - Sub-Saharan Africa to the USA

# Conclusions & Opportunities

- Huge gap in health finance
  - US\$50 billion p.a. to protect our computers from viruses
- Flexibility in disease programs
- Tackle disease causes of health burden
  - Focus and flexibility
