

HIV PREVENTION FOR IDUs Indonesia

Samuel Nugraha

Methods

Harm Reduction

- Methadone Programme
- Recovery Programme
- Needle Syringe Programme (NSP)
- Condom Programme
- Anti Retroviral Therapy (ART)

Peer approached

Challenges

- High mobility of IDUs
- Stigma and discrimination from some members of society and police officers
- Limited facilities
- Dependence on donors / donor driven
- Home-Drug users

Recommendation

- More involvement and commitment from the policy makers, government and local authorities to ensure the sustainability of HIV/AIDS services
- Law and regulation support on Harm Reduction
- A procedure is needed to protect the work of outreach workers

Thank you
